## Agile Lightweight Travel Tripod

The Agile tripod is designed for travel. It's lightweight and unobtrusive, making it perfect for on-the-go use.

The innovative tube locking design allows for quick and easy extension, enabling the tripod legs to be collapsed within 5 seconds.

The rapid engagement locks enable swift adjustments to shooting angle.

Compact, no larger than a water bottle, this light and high-strength tripod is also waterproof, sand-proof, and corrosion-resistant, making it an excellent companion for outdoor travel photography.

Light Weight & Easy to Carry

International standard 1/4" screw mount

Automatic trigger type leg angle adjustor

## Professional Fluid Head

Kingjoy's fluid head serves dual purposes, catering to both camera usage and bird watching. It is designed to support DVs, cameras with medium and telephoto lenses, positional telescopes used in digital photography, and video cameras used in digital astronomy.

Suitable for telephoto bird watching lenses from 200mm, 400MM, 600MM and 800MM.

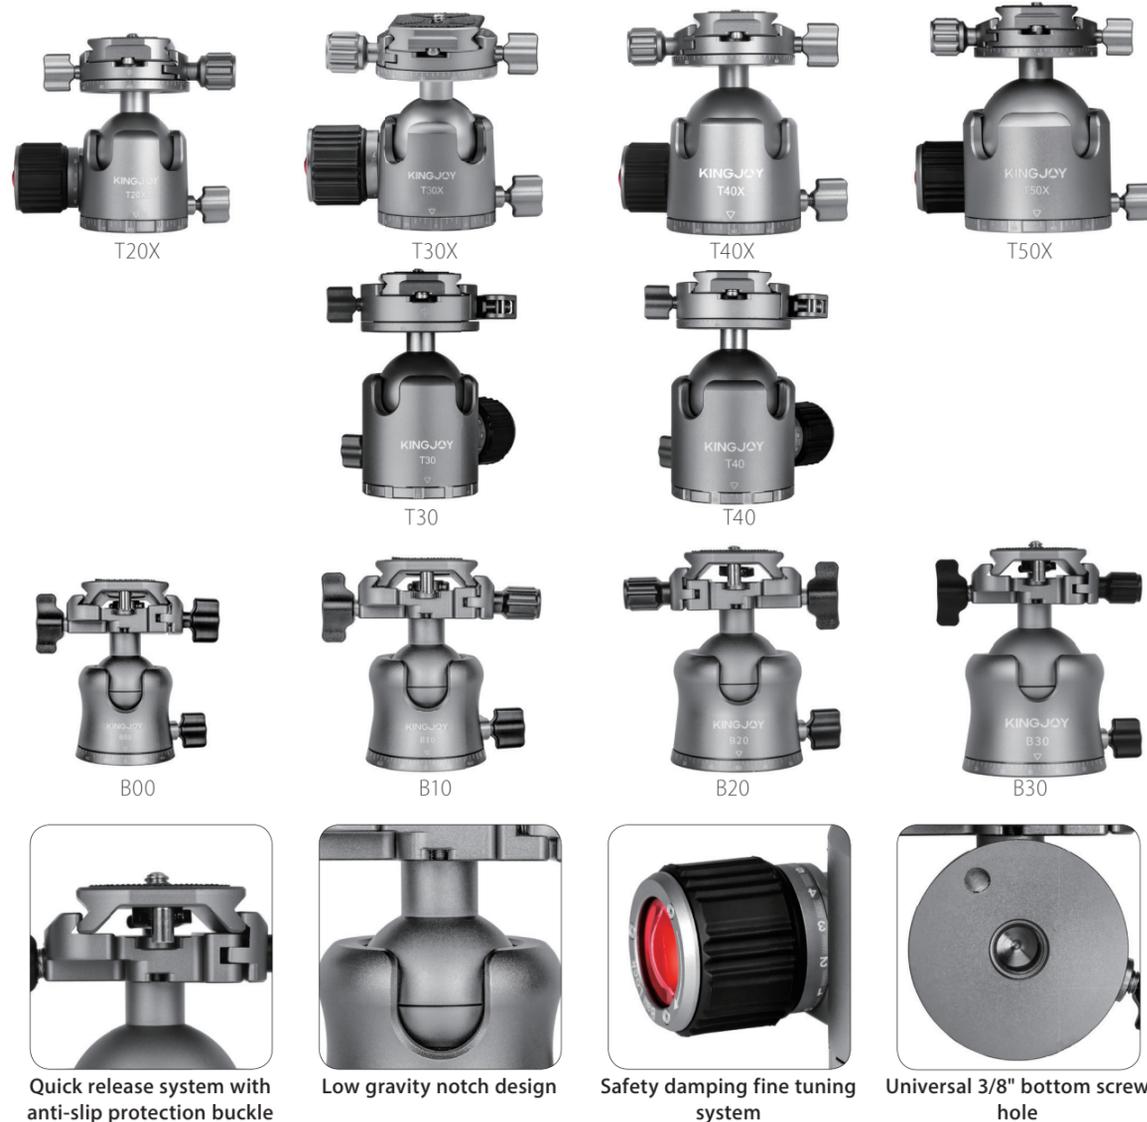

# 05

## Professional Ball Head

Kingjoy's dual panoramic low gravity ball head with safety damping offers both strong locking force and easy maneuverability. Its standout features include support for telephoto lenses and the ability to achieve 360-degree double panoramic shooting, making any angle shooting possible.

The double-notch design allows for quick switching of double pitch angles without moving the tripod. The ball head features fine-tuning damping locking. You can adjust the safety damping based on the weight of the equipment. This, in combination with the quick-release anti-slip safety buckle, ensures double assurance for equipment safety.
